

## Deerns Boilerplate English

Deerns is an independent engineering firm with decades of experience in technical building services, infrastructure, building physics and energy design. Our services cover all trades and industries and all phases in compliance with HOAI. Around the world, our experienced experts develop innovative, tailor-made solutions to meet highly individual requirements: smart, secure, futureproof and flexible. Deerns is one of Europe's leading consultancy firms in MEP-Design and focuses on the real estate, data centre, clean technology and airports markets.

*[optional]*

*Deerns Deutschland is part of the global Deerns Group. The Cologne and Stuttgart sites handle complex construction projects throughout Germany. Our cooperation with clients and staff alike is based on partnership and transparency – across borders and beyond. Our focus on clearly defined markets allows us to specialise and penetrate individual industries.*
